

Ever wonder what pitch to throw when? This table tells you everything you need to know.

Characteristics	Weakness	Pitch
<b>Batting Stance</b>		
Up in front of box	Fast Ball High	Fastest Pitch, rises
In back of box	Breaking Balls	drop or change
Closed stance	Inside	Drop or rise, screw
Open stance	Outside	Out drop or rise, curve or curve drop, or rise
Overly erect	Low	Inside Drop, screw
Wide stance	Low	Drops or curves low and on corners
Crouches over	High	Rise in or out, curve rise, change
Close to plate	Inside	Drop, rise inside
Far from plate	Outside	Out drop or rise, curve or curve drop or rise
Even with plate	High-low	Rises, drops, curves, screw on corners
Tilted Head	Inside	In rise, drop or screw
Weight overshift	Low & outside	Out drop, curve drop, curves to front leg
No weight shift	Inside	Drop or rise, screw
Stride toward plate (closed)	Inside	Drop or rise, screw
Stride away from plate (open)	Outside	Out drop or rise, curve or curve drop, or rise
Long stride	High	Rise in or out, curve rise, change
<b>Type of Swing</b>		
Hitch	High	Rise in or out; curve rise; change
Lunges	High, Mix	Rise in or out, change
Hands high	Low	In or out drop, curve drop, screw
Hands low	High in	Rise in or out; curve rise, change
Hands away from body	Inside	In drop or rise, screw
Loopy swing	High	Rise in or out; curve rise, change

Choppy swing	High	Rise in or out, curve rise, change
No arm extension	Low & outside	Out drop, curve drop, curves, fastball
Parallel bat	High	Rise in or out, curve rise, change
Slow bat/sweeper	Inside	Offspeed, in rise, drop, screw, change
Quick bat	Low	Change speeds, keep hitter off balance
Inside-out swing	Low-in	In drop, screw, change, low rise
Swings up	High, low in	Rise in or out, drop in, screw
<b>Appearance</b>		
Weak batter	Low, outside	Fastball, out drop, curve drop, curves
Strong batter	Low; extreme	Change speeds, drops, drop curve, corner fastball
Relaxed batter	Faster delivery	Pitch with quicker rhythm, change speeds
Tense batter	Slower delivery	Use speed as waste then break ball
Aggressive batter	Change rhythm	Off-speed, In rise, drop, screw, change inside
LH Batter with speed	Low out	Drop, screw, rise, curve, in rise high
<b>Game Situation</b>		
<b>Game Situation</b>	<b>Result Wanted</b>	<b>Pitch to hit</b>
<b>Runners</b>		
On 1st, bunt situation	Poor bunt or pop-up	High in or out Very inside and low
On 2nd, RH-less than 2 outs	Ground ball left side	Low in, change in, high in
On 3rd, RH-less than 2 outs	Ground ball corners	Very low, in or out
On 2nd, LH-less than 2 outs	Ground ball left side	Low out, change out, high out
On 3rd, LH-less than 2 outs	Ground ball left side	Low out, change out, high out
On 3rd, less than 2 outs,	Poor bunt or	High in or out, very low in or pitchout

	pop out	
Batter bunting or pick-off	NO CHANGE-UPS	
Bases Loaded, or on 2nd & 3rd, less than 2 outs	Ground ball	Low in or out
<b>Batter</b>		
Hitter bunts for hit (LH--out & away)	Poor bunt Force to hit	High in or out, change in
Hit and runs	Pop up or ground ball	Low in or jam high in
Ahead in count	Pitch to pitchers strike zone, just outside of batters strike zone; make batter swing at a ball.	
Behind in count	Pitch to umpire's & pitcher's strike zone, never pitch to batter's strength	
<b>Defence</b>		
Right side weak	Ball hit to left	Pitch inside
Left side weak	Ball hit to right	Pitch outside
Outfield weak	Ground balls	Low in or out
Infield weak	Pop ups, fly balls	High in, rises, change-ups
Pitcher tired	Stay away from rise or curve	
Pitch not working	Don't use it except as a waste pitch	
<b>Field</b>		
Fence Short	Ground balls	Low in or out
Fence Long	Pop ups, fly balls	High in, rises, change-ups
Wet Field	Ground balls	Low in or out, stay away from risers
<b>Weather</b>		
Humidity high, low altitude	Pop ups, fly balls	High in, rises, changes, breaking balls
Humidity low, high altitude	Ground balls	Inside, drops, in rise curves, change low

		in
Wind at your back	Jam Pitch	Low,inside (faster ball), high rise inside
Wind in your face	Vary Speeds	Use speed as waste then break ball low, outside

### **Miscellaneous thoughts on pitching**

- In facing a batter, have 3 or 4 pitch sequences in mind before you throw the first pitch
- Throwing low to bunters can generate foul balls.
- Be careful using the change with runners on base.
- Brush back hitters dug in or crowding the plate.
- Know what the batter did the last time at bat.
- Get the first out of the inning yourself
- Avoid pitches to the sweet spot area of the bat, watch hitters practice swings
- Pitch to opposites when in doubt; high/low, inside/outside, fast/slow.
- Use your best stuff on weak hitters. They will hit off-speed every time
- Let your catcher be your eyes at the plate
- Ball movement is more important than speed.
- To pitch faster, pitch slower.
- Know when to walk a batter
